## E-Z Tap Takeoff Collars with E-Z Flange

### Sheet Metal Connectors

E-Z Tap takeoff collars have proven to be an efficient time saver. The E-Z Tap takeoff collar has a one inch flange turned out. This one piece design adds rigidity to the collar. There is a double faced gasket applied to the flange to assure a tight seal. Just peel, stick and fasten with sheet metal screws. E-Z Tap takeoff collars are fabricated in both straight and conical types, from either 26 or 24 gauge galvanized steel meeting spec ASTM A 653 (Lockforming quality). This fitting reduces the need to cut an exact hole and seals the connection after installation.
