

(RBD) Round Back Draft Damper

Description:

The RBD is our round back draft damper designed to fit inside the pipe. The welded 2" deep frame is undersized 1/4" for easy installation. The .025 aluminum butterfly style blades are attached to the damper using 1/4" plated rod and bronze bushings. Attached to the blades is a spring closure that seals the blade up tightly against a neoprene gasket.

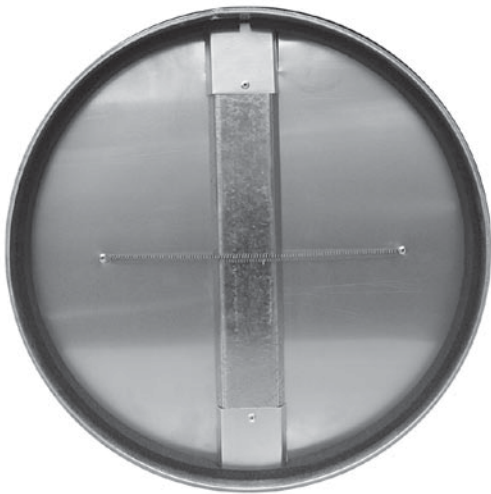

Standard Construction:

List damper as duct size - damper will be undersized 1/4"
